

Student Registration System- asp.net mvc

Project Description

Simple registration system for students use C#,asp.net.

The website users are (students, admin and teachers)

The main page should contain banner of (home, register, Login)

If student loggedin banner should contain (home , profile, courseRegistration, logout)< time table if you can if there is no courses registered note will appear that says ("no courses are available yet")

If admin is logged in banner should contain (home , profile, add course, logout)

If admin didn't upload any course student cant register in any course

If teacher is logged in banner should contain (home , profile, courses registered , logout) <the teacher courses will be added via the admin as well if there is no courses registered note will appear that says ("no courses are available yet")

In registration ask for (first name , last name , password without confirmation ok , email, phone , address, gender using radiobutton, birthday using calendar) and anything you see it important you can add it

This project is created in asp.net mvc
